Easily serve your customers delicious ice cream with this Nice Ice NT15 soft serve ice cream machine with air pump and 2 hoppers!

Great for enhancing the dessert menu at your establishment, this Nice Ice NT15 soft serve machine with an air pump can be used with various mixes to serve a wide range of popular frozen treats, including soft serve ice cream, or yogurt, and even sorbet! With 2 mix hoppers, you can dispense two different flavors or a twin-twist for added variety in one space-saving unit! This machine's air pump injects air into the ice cream to increase its volume. Not only does this allow you to use less ice cream mix while serving more cones, saving you both money and labour cost, but this also creates a lighter and softer product that your customers will love! We offer first day phone support to help you set up the machine and run the first process of making ice cream. Continual phone support is offer free of charge for the first year of use. (Please note we do not offer on site visit for installation/setup).
